Full Stack Developer with 2.5 years of Experience in Development, Enhancement, Maintenance and Implementation. Skilled in Development Using Popular library like ReactJS, NodeJS API Development and Creative designing.

Experience

MARCH 2023 – PRESENT

Software Developer Engineer | M2P Fintech Pvt Ltd | Chennai, India

- Engineered and integrated innovative features across front-end (**React**) and back-end (**Java microservices**) to deliver a seamless user experience.
- Developed and maintained scalable React components, reducing front-end development time by **30%**.
- Leveraged **Redux Toolkit** for robust state management in complex applications, enhancing performance and maintainability.
- Integrated RESTful APIs using Axios to enable smooth data fetching and secure data flow between client-side and server-side applications.
- Crafted complex SQL queries and optimized **PostgreSQL** databases for efficient data handling and retrieval.

MARCH 2022 – MARCH 2023

Associate Consultant | Atos Pvt Ltd | Chennai, India

- Led the full development lifecycle for **LMS modules**, including analysis, design, development, testing, and documentation.
- Developed reusable components in React to **enhance efficiency and** maintain a consistent front-end architecture.
- Utilized NoSQL databases like MongoDB for robust data management and efficient retrieval.
- Conducted code reviews, ensuring adherence to best practices and high code quality.
- Created automated test suites using Mockito and JUnit for comprehensive testing coverage.
